1. The Examiner initially notes that in view of applicants' request he has withdrawn his Restriction Requirement relating to non elected claims 17-30 and 58-62, which along with the elected claims are the only claims remaining in the application.

2. The submitted drawings, while informal in nature, are suitable with respect to the revisions that they propose.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

4. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-30 and 53-62 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 and 32-46 of U.S. Patent No. 6,403,185. Although the conflicting claims are not identical, they are believed to be not patentably distinct from each other even though the pending application is characterized as a divisional of a divisional of the '185 patent. Note that such differences as the absence of a "core" from the first grouping of claims in the '185 patent and the presence of an "actuator in claim 18 of the patent are each believed to be well known elements in the art and thus do not defeat an obviousness type double

patenting rejection, and note also none of the present claims in the pending application are believed to have been originally filed in the '185 patent.
